

Zero Gravity

In the Zero Gravity mode, the angle between the upper half of your body and your legs is approximately 123°. In this position, your thighs and calves are above your heart. The weight of several body parts will be evenly distributed over the chair, relieving pressure from your body. Experience the Zero Gravity sensation and renew your energy.

Zero Space

This special system allows you to smoothly position the entire chair with just one button. The chair can move horizontally by 22 cm, which means that to incline the backrest, it doesn't have to stand more than 5 cm away from a wall. In this way, it differs from classic massage chairs that need to be dragged away. When the backrest starts getting into position, you'll feel as if the chair was "carrying" you forward.

Air Massage of Your Arms

The set of 12 airbags is adjusted to the shape of your body, providing a complex massage of the Yangchi and Quchi points in the forearms. 3D airbag massage has relaxing and revitalizes effects.

Prolonged "L" Design

An ergonomic, prolonged "L" design copies the S-curved shape of your spine. The 95-cm long massage system allows for an effective massage of your glutes and back. Thanks to the correct natural position of spine vertebrae, the massage relieves both your spine and stiff back muscles.

Backrest Heating

The heating function uses long-wave infrared radiation that is transferred through carbon fibre. The backrest is heated up to 40°C – 50°C, which is the optimum temperature for warming your muscles and relieving your pain. Thanks to its wavelength, the infrared radiation penetrates deep tissue, activating cells and stimulating metabolism.

Safety Precautions

The chair features an integrated sensor that will detect potential danger. If an unexpected obstacle appears under the backrest while the chair is operational, all functions will automatically shut down to prevent an injury or a permanent damage to the product.

Length-Adjustable Footrest

The length of the calf rest can be adjusted according to the user's height in the range of 15 cm, to ensure optimum body position with regards to the massage system.

Pressure GUA SHA Foot Massage

This advanced technology simulates professional foot massage that focuses on your feet and the Yongquan point. Whether you choose lower or higher intensity, you will always feel maximally relaxed afterwards.

Air Massage of Your Legs

The variously shaped airbags completely surround the calves, ankles and feet, providing trice the massage experience. Repeated compression and decompression of the airbags stimulate the Xuanzhong and Taxi acupressure points, relieving your muscles and bringing an inner harmony.
